EUI. J. BIOCHEM. 263:471-477(1999).

-I FUNCTION: ITS BINDING TO FIBRONECTIN AND SOME OTHER I CALCIUM DEPENDENT.

-I SUBUNIT: HOMOTRIMER; DISULFIDE-LINKED.

-I SUBCELLULAR LOCATION: Extracellular matrix.

-I ALTERNATIVE PRODUCTS: At least 2 isoforms; 1 (shown least).

-I FUNCTION: EXTRACTIVE SPOINT OF BOTH BASEMENT MEMBRICONNECTIVE TISSUES.

-I SIMILARITY: CONTAINS 3 ANAPHYLATOXIN-LIKE DOMAINS.

-I SIMILARITY: CONTAINS 11 EGF-LIKE DOMAINS.

fibulin 1 precursor, splice form C - Indian.

N;Alternate names: fibulin C
N;Contains: fibulin 1 splice form A; fibulin 1 splice form C
C;Species: Homo sapiens (man)
C;Date: 19-Apr-1991 #sequence_revision 19-Apr-1991 #text_change
C;Accession: C36346; A36346; A32826
R;Argraves, W.S.; Tran, H.; Burgess, W.H.; Dickerson, K.
J. Cell Biol. 111, 3155-3164, 1990
A;Title: Fibulin is an extracellular matrix and plasma glycoprot
R;Argraves, W.S.; Dickerson, K.; Burgess, W.H.; Ruoslahti, Cell 58, 623-629, 1989
A;Title: Fibulin, a novel protein that interacts with the A;Reference number: A32826; MUID:89354537; PMID:2527614
A;Accession: A32826
A;Molecule type: protein
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               A; Residues: 1-39, 'P', 41-685 < CHU>
